Data Logging Data Science Blocked Unblock Follow Chris Lange Follow DAQifi Data Acquisition DAQifi is a small engineering company specializing in sensing data logging and control tools. And if you see the PCI data collection driver and signal processing control in Device Manager you will find that it has disappeared in other devices. Compared with previous systems which are usually custom-made designs that are specific to a particular field or process the use of standard components means that they can be easily and cheaply replaced. I not sure what I should do now since I tried everything you suggested even with the physical CD that came with my motherboard and none of them seemed to fix the problem yet.. In case of software that uses a user mode driver These errors always appear when the driver is started at boot time yes it is possible to see these errors through software but again they are harmless.
